Applied Mathematics Seminar
Monday's, 4-5 pm, in DON 2159

You are cordially invited to attend the Applied Mathematics Seminar series. In the Fall 2013 semester, the seminar series will focus on

Geometry and Symmetry

based

Structure Preserving Numerical Methods

and

Image Processing Tools

for

Ordinary and Partial Differential Equations

with

Applications

in

Medical Science, Data Analysis,

and

Engineering

The series will cover topics from current research in the above areas. Topics will be covered by a series of one to three seminars.
